# Whitelight Collection

Bring the earth into  
your home with our  
new 2021 white  
colors.

A series of four nature-inspired  
lighter colors that are washed in  
the purity of white and wrapped  
in the smoothness of stone.

It's a mark of our craftsmanship  
and care, carefully passed from  
us to you.

# The Whitelight Collection

Now is the perfect time to bring the earth into the home, draped in the purity of white. Caesarstone's latest collection, Whitelight, offers the most current compositions of lighter neutral colors for interiors that provide a sense of wellness and serenity.

5171 Arabetto

Crisp pearly lustres and soft sandy hues connect the home from the inside with the earthy warmth of the world outside. This lightness creates a new sophisticated backdrop, refocusing us on human-centred spaces that merge style with cleanliness. Whitelight is a reflection of this union with designs that look to tomorrow's horizon.

## 5112 Aterra Blanca

Aterra Blanca is an elegant surface featuring a misty white base with fine earthy veins that transcend the entire slab. These layers achieve a subtle yet evocative and textured look reminiscent of majestic ancient column-lined paths.

## 5171 Arabetto

Marble always leaves a lasting impression. Arabetto updates an elaborate marble with a web of studied jade and copper lines distributed across a pure white base, with denser grey and dark grey veining that adds a bold and refreshing direction to the surface.

## 5114 Calacatta Maximus

Calacatta Maximus reimagines calacatta gold. Oversized soft grey veins enriched by fine copper-gold outlines, traverses the pure white background turning this surface into a luxurious work of art.

## 5222 Adamina

Three shades of sand compose Adamina's earthy complexion into a soft neutral that gently reflects light. Paler touches of taupe veil the surface and add dimension. Adamina uplifts sandstone bringing warmth into any setting.
